## Summary

Passionate and student-focused Biomedical Engineer with over five years of experience in academic laboratory instruction, curriculum development support, and undergraduate mentoring. Holds an MSc in Biomedical Engineering (Biomedical Imaging) and a BSc in Biomedical Engineering from Jimma University. Skilled in delivering hands-on training in biomedical instrumentation, medical electronics, and imaging systems. Known for the ability to simplify complex technical concepts and foster active, inclusive learning environments. Dedicated to academic excellence, professional development, and contributing meaningfully to the advancement of Biomedical Engineering education.

## Teaching Philosophy

I view teaching as both an instructional and mentorship role, centered on supporting student growth academically and professionally. My approach emphasizes clarity, engagement, and practical application, enabling students to confidently understand and apply biomedical engineering principles. I aim to cultivate inclusive, student-centered classrooms that encourage active learning, critical thinking, and collaboration. Through individualized support, constructive feedback, and hands-on guidance, I strive to prepare students not only for academic success but also for responsible and impactful professional practice.

## Key Skills

|                                |                                                                                                          |
|--------------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Teaching and Mentoring:</b> | classroom instruction, student advising, and supervision                                                 |
| <b>Laboratory Instruction:</b> | Hands-on lab setup, equipment demonstrations, and practical session Teaching                             |
| <b>Instrumentation:</b>        | calibration, maintenance, and troubleshooting of biomedical equipment                                    |
| <b>Medical Imaging:</b>        | Image processing and analysis using MATLAB and Python                                                    |
| <b>Software Proficiency:</b>   | MATLAB, Python, LaTeX, Proteus, AutoCAD                                                                  |
| <b>Embedded Systems:</b>       | Arduino, Raspberry and PIC programming with biomedical sensor integration                                |
| <b>Research Support:</b>       | Assistance in experimental design, biomedical signal acquisition and data analysis, and academic writing |

## Experience

- Jun 2023 – **Chief Laboratory Assistant**, *Jimma University, Institute of Technology*, Jimma, Ethiopia  
Present
- Manage daily operations and supervise biomedical labs.
  - Maintain, calibrate, and troubleshoot medical devices.
  - Support faculty with research activities and student training.
  - Ensure compliance with safety protocols and inventory tracking.
- Oct 2019 – **Senior Lab Assistant**, *Jimma University, Institute of Technology*, Jimma, Ethiopia  
Jun 2022
- Assisted in laboratory setup and equipment handling.
  - Delivered technical demonstrations and maintained lab tools.
- Mar 2017 – **Intern – Biomedical Engineer**, *Adama Medical College Hospital*, Adama, Ethiopia  
Jun 2017
- Participated in maintenance of biomedical instruments.
  - Gained practical exposure to hospital device management.

## Education

- 2022 – 2025 **MSc in Biomedical Engineering (Biomedical Imaging)**, *Jimma University*, Jimma, Ethiopia  
CGPA: 3.79 / 4.00 & Very Good Thesis Result  
Thesis: "*Multi-disease Diagnosis from Retinal Fundus Images Using Deep Learning*"
- 2012 – 2018 **BSc in Biomedical Engineering**, *Jimma University*, Jimma, Ethiopia  
CGPA: 3.53 / 4.00  
Thesis: "*Design and Development of an Insulin Pump*"

## Certifications

CBTP, DTTP, TTP Community and Technical Programs  
TOT training on selected laboratory Equipments  
Biomedical Equipment Maintenance Training  
Laboratory Safety and Risk Management

## Languages

Afan Oromo Native  
Amharic Proficient  
English Proficient

## Strengths

Self-motivated and adaptable  
Multicultural collaboration  
Problem-solving and self-learning
